Web of Science (WoS)
Publications, citations and h-index

TUT Library
9/2016
Finding and recognizing all the publications of a certain researcher can be difficult. Therefore, pay attention to these points before making citation analysis:

**Authors with the same name / popular names** – make sure that your citation analysis includes the publications of the right author.

**Variations on spelling the author’s name** – in the database the author might have publications on several names or the name might be spelled differently

- new last name by marriage
- initial / initials of the author – the way of using initials might vary with publication, sometimes the use of initials differentiate an author from another author (e.g. Ruotsalainen U vs. Ruotsalainen UH)
- names with Scandic letters or special characters (apostrophes, accent marks) can be problematic, as well as last names consisting of two or more parts

In WoS you can do author search by using ORCID or ResearcherID.

Increase visibility of your publications by combining all your publications under one researcher profile (WoS ResearcherID). You can also create ORCID identifier, which is permanent and unique digital identifier for researchers.

Read more about connecting ORCID and TUTCRIS: [http://scienceport.tut.fi/tutcris/connect-your-orcid](http://scienceport.tut.fi/tutcris/connect-your-orcid)

WoS – Publications and citations

Select Web of Science Core Collection from the drop-down menu.

Carry out search by author name.

You can also do author search by browsing by author (Select from Index).

Change settings if needed.
Publication list

Exclude authors with the same name and refine your results if needed by, for example, WoS Categories, other authors, publication year or organization.

If your result list still includes incorrect article matches, you can hand-pick your own publications and add them to the Marked List.
The orange sign indicates that the publication is on the Marked List.

If needed, you can remove an article from the Marked List by clicking the red cross.
Creating a citation report

Create citation report by choosing Create Citation Report either on the result page or on the Marked List.
Citation report - indicators

The sum of citations of the selected publications and the h-index

<table>
<thead>
<tr>
<th>Indicator</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sum of the Times Cited</td>
<td>5503</td>
</tr>
<tr>
<td>Sum of Times Cited without self-citations</td>
<td>5201</td>
</tr>
<tr>
<td>Citing Articles</td>
<td>3932</td>
</tr>
<tr>
<td>Citing Articles without self-citations</td>
<td>3814</td>
</tr>
<tr>
<td>Average Citations per item</td>
<td>26.98</td>
</tr>
<tr>
<td>h-index</td>
<td>44</td>
</tr>
</tbody>
</table>
You can export citation report to Excel on Marked list by choosing Save to Excel File.
